

- Set around a hill with sweeping views of Laikipia landscape.
- 40'000 acre private wildlife conservancy in Laikipia with impactful community and conservation programs
- All the big cats, endemic Northern species of Grevy Zebra, Beisa Oryx, Jackson's Hartebeest, Gerenuk and Reticulated Giraffe

The House

Governors' Mugie House is the perfect addition to the Governors' Camp Collection, expanding an already diverse array of wildlife locations and activities.

Individual stone cottages with wide windows are set out around a hill in the heart of the conservancy, giving sweeping views over the Laikipia plains and to Mt Kenya. Each spacious en suite cottage offers luxurious baths and open log fires.

The interior design, by Chris Payne of White Elephant Trading Company who also styled Sabyinyo Silverback Lodge and Il Moran Camp, uses eye-catching colours and patterns to bring a modern spin on a classical safari style, creating the perfect welcoming nature retreat.

A large main house with open log fires will host guests for relaxing cocktails and scrumptious meals, prepared from a creative menu with ingredients sourced from Mugie House's own vegetable garden. And an infinity pool-with-a-view offers lovely shaded areas and a casual alfresco dining area. A waterhole set in front of Mugie House attracts a variety of wildlife, including large elephant herds, visible throughout the day from the lodge or hide.

The Conservancy

Securing land for wildlife is a conservation imperative in Africa today. Covering almost 50'000 acres, Mugie Conservancy provides a key wildlife access route between the Laikipia plateau, the Mathews Range and the Samburu lands to the north and east. Vast acacia-dotted savannahs, olive forests and scrubby bush are a haven to a multitude of wildlife in plentiful numbers, including all the big cats, buffalo, elephants and endemic northern Kenyan species such as Grevy's Zebra, Jackson's Hartebeest and Reticulated Giraffe, and wonderful northern Kenya birdlife.

Mugie Conservancy is at the forefront of modern conservation models, operating as a low-impact cattle ranch alongside preserving the delicate eco-systems. Cutting edge community grazing and livestock trading programs based on the concept of shared resources and encouraging quality over quantity have engaged the local community as stakeholders in the protection and conservation of Mugie. Guests are welcome to visit events such as community "Dip Day" on Saturdays to witness this colourful community, and collaborative agriculture and conservation in action.

Mugie supports research conducted by the Cheetah and Wild Dog Project and Lion Landscapes with collaring and data collection of a cheetah and two lion. Also engaging community members in data gathering, a goal is to prevent human-wildlife conflict through monitoring movement and identifying potential points of conflict ahead of time.

Mugie Conservancy aims to inspire the world to protect its natural habitats by creating a successful 21st century model of profitable conservation.

Accommodation

- 5 Cottages (120m²)
- 2 Honeymoon Studios with plunge pools (80m²)
- 1 Family Cottage - 2 double cottages adjoined by a sitting room

Facilities

- *Charging facilities in rooms and main area*
- *24 hour power; completely solar; 220 volt*
- *Universal sockets*
- *Wi-Fi & cell reception*
- *Indoor and al fresco dining*
